DETAILED ACTION

Election/Restrictions

This application is in condition for allowance except for the presence of claims 18-22 directed to a non-elected method of manufacturing an actuator for a disk drive without traverse. Accordingly, claims 18-22 have been cancelled.

Allowable Subject Matter

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1 and 17 recite:

"A vertical coil defining a radially exterior surface and a coil plane disposed orthogonal to the horizontal plane, the coil being disposed in mechanical communication with the support extensions and the coil support tab for supporting the coil within the channel, the radially exterior surface being disposed in mechanical communication with the coil support tab."

This limitation, in combination with the limitations of the other claims, are neither anticipated, nor rendered obvious by any prior art of record.

The closest reference, McReynolds et al (US Patent Number 6687095), discloses a coil support tab, however, the coil plane is not positioned orthogonal to the plane of the actuator arm, and the coil is not supported by its exterior radius.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
